Product Description

Product Description:

A steering knuckle, also known as a steering upright or spindle, is a crucial component of a vehicle's steering system. It is located at the front axle and is responsible for connecting the wheel hub or bearing assembly to the suspension components and steering linkage.

Features:

High-Quality Materials

We only use the finest materials, such as forged or cast steel, for maximum strength, durability, and resistance to wear and tear. These materials undergo stringent testing to meet the highest industry standards, ensuring long-lasting performance and dependability.

Corrosion Resistance

Our steering knuckle is specially coated or finished to withstand corrosion and endure challenging environments. This protection extends the lifespan of the knuckle and maintains its performance over time.

Enhanced Performance

Our steering knuckle is designed to offer precise and smooth steering response, enabling accurate control and maneuverability. It also helps maintain proper wheel alignment and suspension geometry, contributing to improved handling and a better driving experience.

Tested and Certified

Each of our steering knuckles undergoes rigorous testing and quality control procedures to ensure its reliability and performance. It meets or exceeds industry standards and comes with a warranty, providing you with peace of mind and trust in your purchase.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .
